

West 66th Street

This duplex apartment on the 59th and 60th floors of a high-rise in the Lincoln Center neighborhood is home to an avid lawn bowler and his family. The apartment was chosen for the views overlooking Central Park. The owner wanted to draw a sense of the park outside into the apartment. We accomplished this by using natural materials, patterns from nature, and bright colors. Natural pebbles were used on the shower floor; the pattern of the stones was transcribed, by means of laser technology, onto the glass panels and wood cabinetry. The color palette reflects a perfect day in the park; the bright orange kitchen is like the sun, while the dining and living spaces bask in its glow. The interior furnishings were chosen to complete this idea. The green carpet echoes the great lawn; the blue chairs reflect the bluest sky; and, the large wooden slab dining table anchors the space like an ancient tree.

Square Feet: 2,000
Location: New York, NY
Completed: 2008
